PROJECTS

Sorting Visualizer | Sorting Algorithms Dec 22
Description: Built a sorting visualizer system using HTML, CSS, JavaScript, VS Code. In this I used different sorting algos like Merge sort, Insertion sort, Quick sort, Heap sort etc.
- Worked on different sorting algos Time Complexity and Space Complexity.
- Also used Array as bar graph for sorting and applying different algos on the bar graph.

Resume Generator Application | Frontend Development July 22
Description: Built a resume generator system using HTML, CSS, JavaScript, Bootstrap, VS Code. It is intended and accomplished to help instant resume as well as provide faster, more advanced, effective, and simplified services. This software solution's user interface is efficient and user-friendly.
- Designed a program to generate instant resumes to reduce the time for the users.
- Used ID's, Classes & JavaScript DOM Manipulation for fetch data from the user.
